IMAGIO FOLIO 64 NOTES:

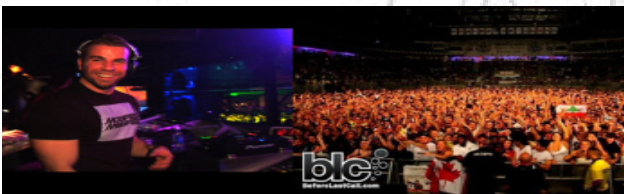

Hello Imagio users. Thought I'd write some notes for this installment since we've got some great things happening.

As you all know Ian Fish from Heart FM West Midlands was the \$500 prize winner in our Imagio suggestion contest. Ian came up with two great ideas. The first was to create a tension bed and sweeper like "Who Wants to Be A Millionaire" for prize contests. Well wait no longer. Please check out the music bed MegaQuiz and all it's matching sweepers. We've designed it to work as an A B roll. There are stabs, endings, accents, etc. to hit points in real time when questions are answered. Give it a try on your next phone in question segment.

Ian's second idea was to get different voices to record individual letters and numbers so that he could spell out H-E-A-R-T or 1-0-0-7 with a bunch of different voice samples. We've started that process and are doing letters, numbers, the word "point", the word "dot", the word "com" and the word "at". We plan on doing it English with British, regular, southern, Caribbean, males, females, girls, boys and also in Spanish, French, German, Italian and Russian. If we've left you out then please send us an email requesting your language at Imagio@TMStudios.com

We've also included another Reggae track as suggested by Scot Kirk from the Jones Radio Network. Please check out "One Dub" and thanks for the suggestion Scot.

We'd also like to congratulate one of our Imagio writers James Doman. He's just released a new song called "Everything's Gonna Be Alright" and it's now on the Radio One Upfront Playlist in the UK. Official digital release from EMI is September 7th on itunes and through BDS and Mediabase. The video and single will be released on Sept 15th. Congratulations and good luck with the song. Here's a picture of James as the opening DJ for Tiësto in Toronto recently. There were several thousand people in the audience.

Remember, if you have a request just send an email to our new request line: Imagio@TMStudios.com and we'll do our best to get it added to the library immediately. We're here to make your life easier. Most requests are fulfilled within a week and the user is sent an mp3 even before the next Imagio update.

The entire Imagio team thanks you for your support.

Sincerely, Rob Rettberg – IMAGIO Producer

GET THE ENTIRE IMAGIO LIBRARY ON HARD DRIVE

We still have a lot of users out there that are not taking advantage of the IMAGIO Hard Drive. You can have the entire IMAGIO library on hard drive. What are you waiting for? We all need to save time with our increased workloads and this is the way to really get efficient. The drives we supply also have enough room for our Audio Architecture library as well as many years of automatic monthly updates. It's an external drive that works with Firewire or USB and... we'll format it for PC or Mac!

Imagine having all the Sweepers, Stagers, Music beds and FX from Folio 1 to the most current Folio delivered to you on one external hard drive. The audio files are all named with our long, descriptive naming format and pre-sorted into easy to use category folders. No more lost discs or CD clutter. No more trying to find a Holiday Sweeper over 9 years of discs. Just browse through the folders, audition, import, and produce. We've kept all of the audio in uncompressed .WAV format to retain the highest audio quality.

You'll still receive regular updates on CD-ROM or through our automated online update system. Both ways have a program that automatically puts your new audio into the proper category folders on your drive and... puts an extra copy in special folder called "NEW_STUFF". The "NEW_STUFF" folder always contains your most recent update. Here's another great benefit, the drive can be shared over a network between production studios. You can forget about tracking down discs that get scattered between multiple rooms!

Give your Jones™ rep a call and get your IMAGIO hard drive today.

Sincerely,

Rob Rettberg
